To Whom It May Concern:

I have had the pleasure to employ and work with CES on the Town Square project for over 1 year. They were contracted to complete all of the site fiber systems and security systems.

My favorable impression of CES started from the very first bid obtained and was reinforced time and time again by their field performance. The company was fair and professional, using their expertise to satisfy the client at all costs, even during the most trying of times and demands riddled with schedule constraints. It was always a "can-do" attitude, full of commitment, pride, and integrity.

The successful lifestyle center opened in November 2007 - in part to yet another cooperative team member, CES.

Thank you for all of your hard work,

Kathryn Welniak
